

JAKUB PABIS

About

I am a self-taught web developer and designer with a passion for exceptional design in both the graphic and programming realms. I have over 12 years of experience in programming and graphic design, working with both small and large agencies in Europe, as well as managing web-based projects for my own global clientele.

In 2016, my wife and I established a limited company to better handle our projects and to work as a contractor for larger agencies.

Recently, I've developed a new passion for photography and filmography. This interest has given me a different perspective on design and pushed me to learn new skills.

Skills

HTML	CSS / SASS	JavaScript	ReactJS, NextJS, NodeJS, Strapi
